EXPERIMENT 6

Case Study: Food Delivery Application – Positive Test Scenarios and Test Cases

Aim:

To identify and analyze the functional requirements of a Food Delivery Application and design positive test scenarios and test cases to verify that the application works correctly with valid inputs.

1. Problem Description

A Food Delivery Application lets customers register, search restaurants, view menus, add food to a cart, pay for orders and track delivery. Testing verifies that these functions work correctly with valid inputs.

2. Functional Requirements

1. Users must register and log in using valid details.
2. Users must search for restaurants and food items.
3. Only available food items can be added to the cart.
4. Quantity and total price must be calculated correctly.
5. Valid delivery details are required.
6. Orders are confirmed only after successful payment.
7. Users can track eligible orders.

3. Positive Test Cases

Positive testing verifies expected behavior using valid inputs.

Test Case ID	Test Scenario	Test Input / Action	Expected Result	Status
PT01	Register a new user	Enter valid name, email and mobile number	Account created successfully	Pass
PT02	Login with valid credentials	Enter registered email and correct password	User logs in successfully	Pass
PT03	Search for a restaurant	Search by restaurant name	Relevant restaurants displayed	Pass
PT04	View food menu	Open a restaurant page	Menu and prices displayed correctly	Pass
PT05	Add food to cart	Select an available food item	Item added to cart	Pass

PT06	Update food quantity	Increase quantity within available stock	Quantity and total updated correctly	Pass
PT07	Enter delivery address	Enter valid address and PIN code	Address accepted	Pass
PT08	Make successful payment	Use valid payment details in test environment	Payment succeeds and order is confirmed	Pass
PT09	Track an order	Open active order details	Current order status displayed	Pass
PT10	Cancel eligible order	Cancel within permitted cancellation period	Order cancelled successfully	Pass

Conclusion

The positive test cases help verify that the Food Delivery Application meets its requirements and responds appropriately to the tested conditions.
